## WEB DEVELOPER

Passionate Web & WordPress Developer with 2+ years of experience in WordPress and over 3 years in web development. Skilled in building responsive, high-quality websites using Elementor and Divi, with a strong foundation in Linux environments. Experienced in DevOps tools and practices including Docker, Kubernetes, AWS, Ansible, and monitoring systems like Prometheus, Grafana, and Nagios. Committed to delivering secure, scalable, and maintainable solutions that align with modern web and infrastructure standards.

## KEY COMPETENCIES

WordPress Development	Git & Version Control	Virtualization (Proxmox)
Custom Theme Development	Page Builder Expertise (Divi, WPBakery, Elementor)	Cloud Services (AWS)
Theme Customization	UI/UX Design (Figma, Canva)	Infrastructure Automation (Ansible)
Front-end Development	SSH & FTP Server Management	Monitoring & Observability (Prometheus, Grafana, Nagios)
PHP & MySQL	Linux & FreeBSD Administration	Strategic Problem-Solving
JavaScript & jQuery	Docker & Kubernetes	Web Performance Optimization
		Project Management Tools (Trello)

## PROFESSIONAL EXPERIENCE

**Monday Digital | Satkhira, Khulna, Bangladesh – HYBRID**

**June 2025 – Present**

### Web Developer

As a Web Developer, I manage and maintain WordPress websites, ensuring they remain secure, updated, and fully functional. My responsibilities include supervising site performance, optimizing code for speed and SEO, troubleshooting and fixing technical issues, and implementing improvements for better user experience and reliability. I work closely with teams to deliver high-performing, scalable web solutions.

#### Accomplishments:

- Managed and maintained WordPress websites to ensure security, updates, and full functionality
- Supervised overall site performance, identifying and addressing performance bottlenecks
- Optimized code for speed, scalability, and SEO best practices
- Troubleshot and resolved technical issues to ensure site reliability and uptime
- Implemented improvements to enhance user experience and interface consistency
- Collaborated closely with teams to deliver scalable, high-performing web solutions

**Monday Digital | Satkhira, Khulna, Bangladesh – HYBRID**

**June 2024 – May 2025**

### Junior Web Developer

Involved in full-cycle WordPress development projects, focusing on custom theme creation, page builder customization, and ongoing website maintenance. Collaborated with designers and developers to ensure responsive and visually engaging websites aligned with client goals.

#### Accomplishments:

- Developed custom WordPress themes tailored to client requirements with responsive, SEO-friendly layouts.
- Translated Figma designs into fully functional and interactive web pages.
- Managed website content updates, plugin installations, bug fixes, and performance optimization tasks.
- Utilized Elementor and WPBakery Builder to build dynamic and user-friendly front-end interfaces.
- Coordinated with team members to deliver high-quality web solutions within deadlines and maintain client satisfaction.

#### **Monday Digital | Satkhira, Khulna, Bangladesh – Onsite**

**February 2024 – May 2024**

##### **Junior Web Developer – Internship**

Assisted in various aspects of WordPress development and support tasks, gaining foundational experience in modern web development tools and workflows.

#### Accomplishments:

- Supported theme customization, plugin integration, and content updates within WordPress sites.
- Conducted website maintenance including troubleshooting, bug fixing, and update management.
- Enhanced site designs and layouts using Elementor Builder for improved performance and user experience.

#### **WebFix Lab | Dhaka, Bangladesh – Remote**

**July 2023 – January 2024**

##### **Junior WordPress Developer**

Worked with clients across various industries to develop, maintain, and optimize WordPress websites. Delivered secure, responsive, and SEO-friendly solutions while collaborating closely with remote teams to meet project goals.

#### Accomplishments:

- Developed and maintained WordPress websites tailored to individual client needs, ensuring both aesthetic quality and technical functionality.
- Optimized site performance focusing on speed, mobile responsiveness, and SEO best practices to enhance user experience and visibility.
- Maintained confidentiality and professionalism while managing client projects and handling sensitive data.
- Collaborated with designers, developers, and stakeholders to deliver customized web enhancements and updates efficiently.

## PROJECT

#### **Personal DevOps Lab**

**Nov 2024 - Nov 2024**

##### **DevOps Engineer**

**Source Code:** <https://github.com/hmjahid/devops-projects/tree/main/docker/server-monitoring-stack>

Designed and deployed a comprehensive DevOps monitoring solution within a self-hosted lab environment to replicate real-world server infrastructure scenarios. This project aimed to build practical expertise in setting up full-stack observability and incident response workflows. The environment was crafted to monitor both system-level and application-level performance metrics, enabling real-time visibility into the health, availability, and resource utilization of services. Emphasis was placed on integrating widely-used open-source tools to simulate production-grade monitoring practices, including data collection, metric visualization, and proactive alerting. The setup provided hands-on experience in troubleshooting, optimizing system performance, and maintaining service reliability—essential skills in any modern DevOps workflow.

#### Project Highlights:

- Deployed and configured Prometheus, Grafana, Node Exporter, and cAdvisor using Docker to monitor system metrics in real time.
- Implemented Alertmanager to notify critical issues through custom alert rules and routing.
- Set up Redis Exporter to track memory usage and command rates for Redis cache.
- Integrated Nagios Core for legacy monitoring support alongside modern tools.
- Utilized Uptime Kuma for HTTP uptime monitoring with customizable intervals and alerts.
- Created reusable Docker Compose files for quick setup and scalability across different machines.
- Tuned alerting thresholds based on usage patterns and system benchmarks for proactive incident response.

#### Hypnotherapy with Shelly O'Brien

February 2024 – March 2024

#### WordPress Developer (Contract)

Live Site: [hypnotherapywithshelly.com](https://hypnotherapywithshelly.com)

Developed a personalized hypnotherapy service website to help clients achieve their goals through expert-led sessions. Focused on delivering a calming, responsive, and brand-aligned online presence to reflect the nature of the therapy service.

#### Project Highlights

- Designed and built a fully responsive WordPress website using the Divi Builder, ensuring optimal performance across all devices.
- Created a custom layout and branding strategy tailored to the client's vision and identity.
- Developed dedicated pages for services, testimonials, and therapist introductions to establish credibility and clarity.
- Integrated a user-friendly contact form to streamline client inquiries and engagement.
- Customized Divi elements extensively to match the calming and professional aesthetic desired by the client.
- Ensured accessibility, mobile responsiveness, and SEO best practices throughout the project lifecycle.
