## PROFILE

I am a skilled WordPress developer with 2+ years of experience in WordPress development, theme customization, custom theme development, and responsive design. Proficient in server migration, website maintenance, and leveraging DevOps tools like Docker, Kubernetes, Prometheus, Grafana, and AWS to enhance workflows. A detail-oriented team player with strong problem-solving and creative skills, I excel in delivering optimized and reliable web solutions.

## SKILLS

- Skilled in problem-solving, WordPress development, custom theme development, and theme customization with hands-on experience in Divi, WP-Bakery, and Elementor page builders.
- Proficient in front-end coding, web design, and using version control systems (Git).
- Skilled in PHP, proficient in MySQL, and experienced with JavaScript, jQuery, and Bootstrap.
- Knowledgeable in SSH and FTP for secure server access and file management.
- Experienced with design tools such as Figma and Canva, and project management tools like Trello.
- Experienced with Unix-like OS (FreeBSD, Linux), server platforms (Proxmox, Ubuntu, CentOS, RHEL), Docker, Kubernetes, and AWS.
- Skilled in Ansible, virtualization, and server monitoring using Prometheus, Grafana, and Nagios.
